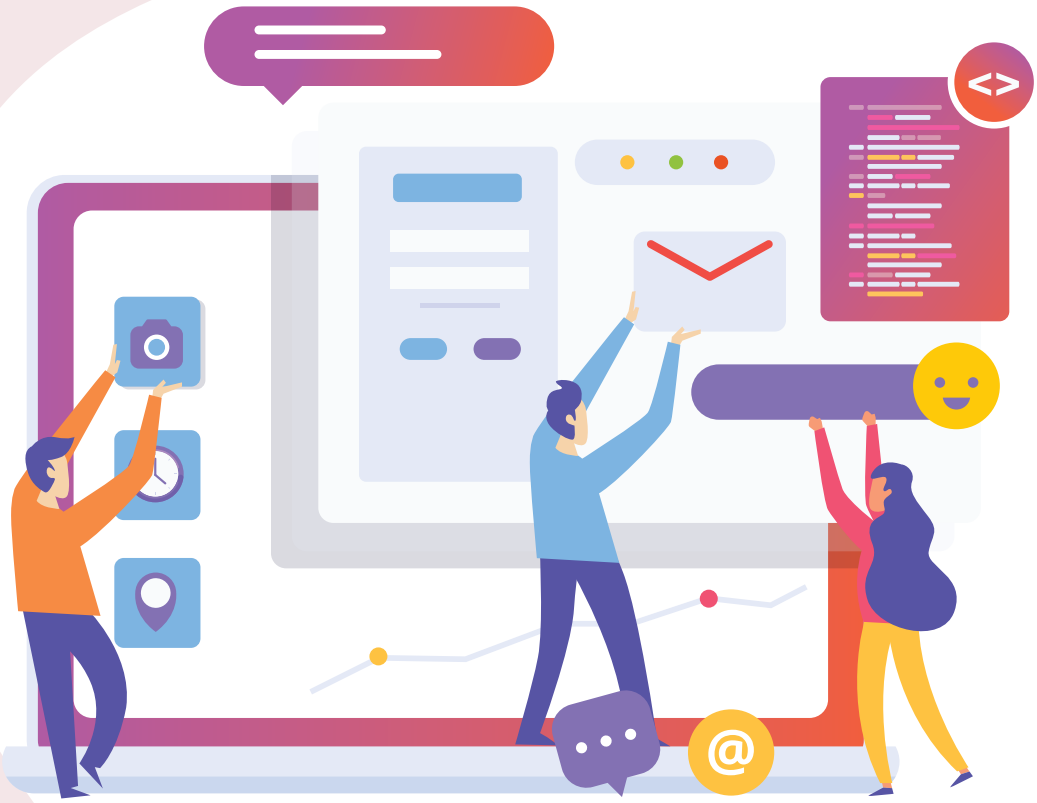
Introducing

Ondeq

A new platform to help workforces
get it done the right way

Every location, every day



www.ondeq.net

About us

Ondeq is based in San Francisco, California in one of the world's leading technology hubs. The founders have always had a passion for great software that delights people, building global scale products over the years that touch the lives of millions every day at organizations like Microsoft, Fox, Computer Science Corporation, and Stanford University.

In the last few years, there have been great advances in 3 key technologies: mobile devices, cloud services, and data processing. As a result, business applications that previously took armies of highly specialized software developers to build and maintain could now be created at a fraction of the cost.

What Is Ondeq

Managing spread out teams is hard. Ondeq ensures the work gets done right, everywhere.

Location

Site level execution of operational tasks

Field Management

Audits & walks for the field

Corporate office

Central Control And Rolled Up Reports

Right Actions

It can be frustrating when your workforce is not getting the right things done consistently. Insufficient knowledge of new policies, non compliant standards ... all these failures compound over time. The result is a subpar customer experience and less sales.

Right Information

To take the right actions, your team needs the right information. Too often, the Field and Managers are flooded from too many directions -- emails, phone calls, texts, portals, paper. This results in a lack of clarity about the most important things that need to get done, and by when.

Right Tools

Old processes are clunky and steal hours every week. Empower your team with the right mobile and web tools to make work a lot more efficient. As a result, workers can focus on higher priority work like more customer time on the sales floor or staff training.

Early Success

50%

Increase in on time completion of important tasks

83%

Reduction in locations with low or poor compliance to standards

100%

Internal adoption of the new platform among managers

"We had no immediate visibility to ensure tasks were being completed. Our district teams have benefited from Ondeq by having clear visibility around completion of tasks that are being communicated from corporate and from district teams. Knowing that your team members have completed what you asked them to do with one click of a button has improved execution across all stores."

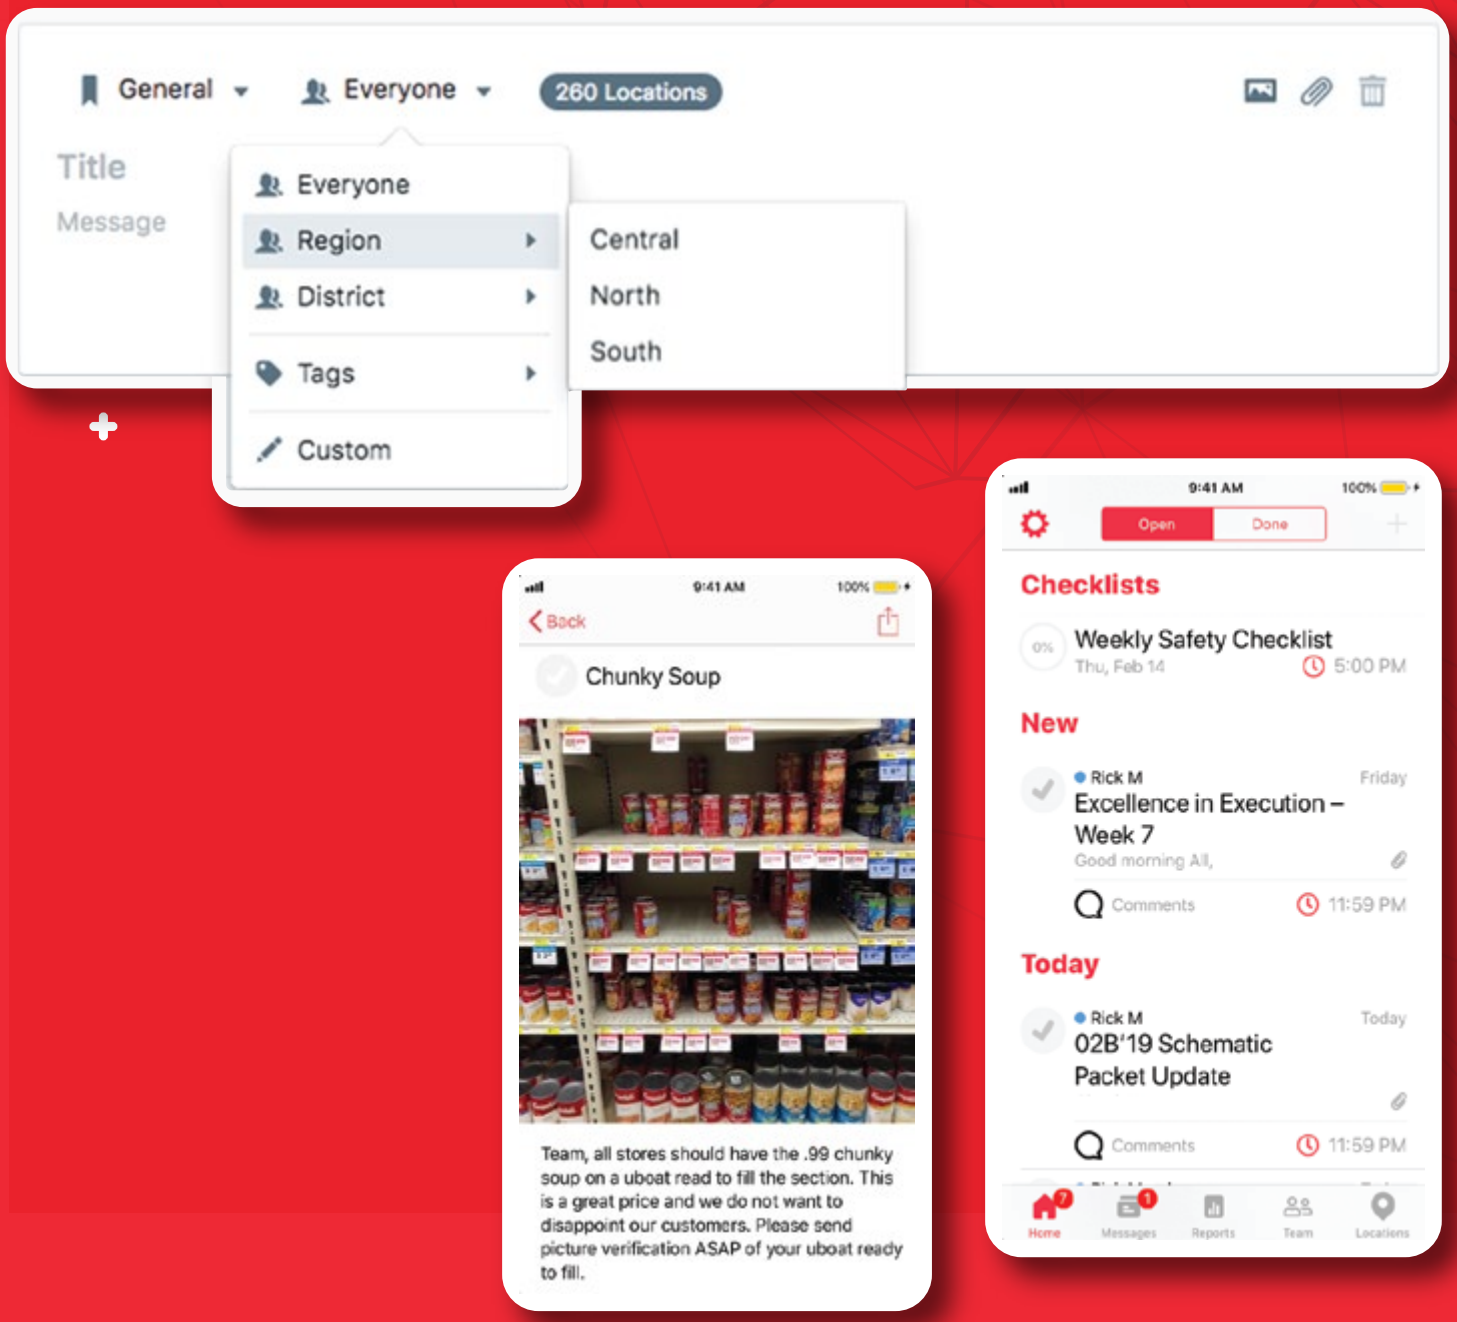
$4.6 billion annual sales

"One of the major challenges that we faced within our organization was managing store standards and consistency across all of our locations. Through the use of site surveys, our field management teams are able to provide real time updates and photos of store conditions, as well as leaving detailed notes for the store team outlining potential areas of improvement."

$5 Billion market cap

Tasks

Assign important actions to your team, in real time or on a recurring basis. They can access from any device, add photos, and sign off.



Dashboards

Summarize all the activity going on in easy to use reports. Dashboards rollup key statistics and let you filter so you can dig down to regions, districts, and stores.

Drill Down Reports

Drill down to individual locations to see a detailed log of what has been completed, when, and what has not.

Overall	On time	
91%	55%	3

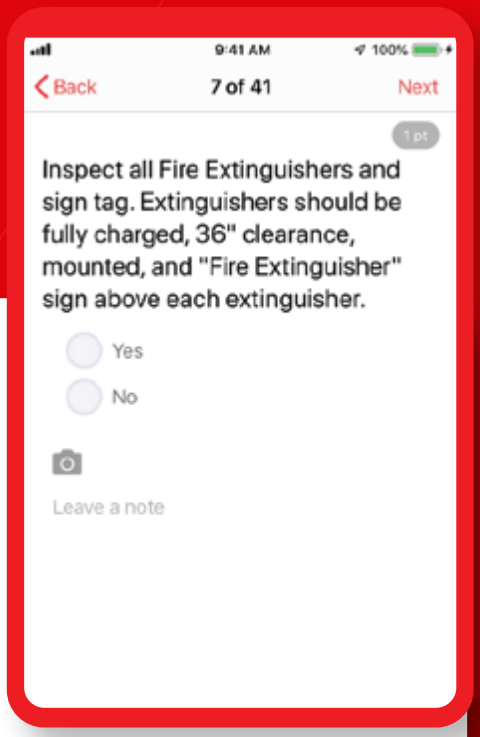
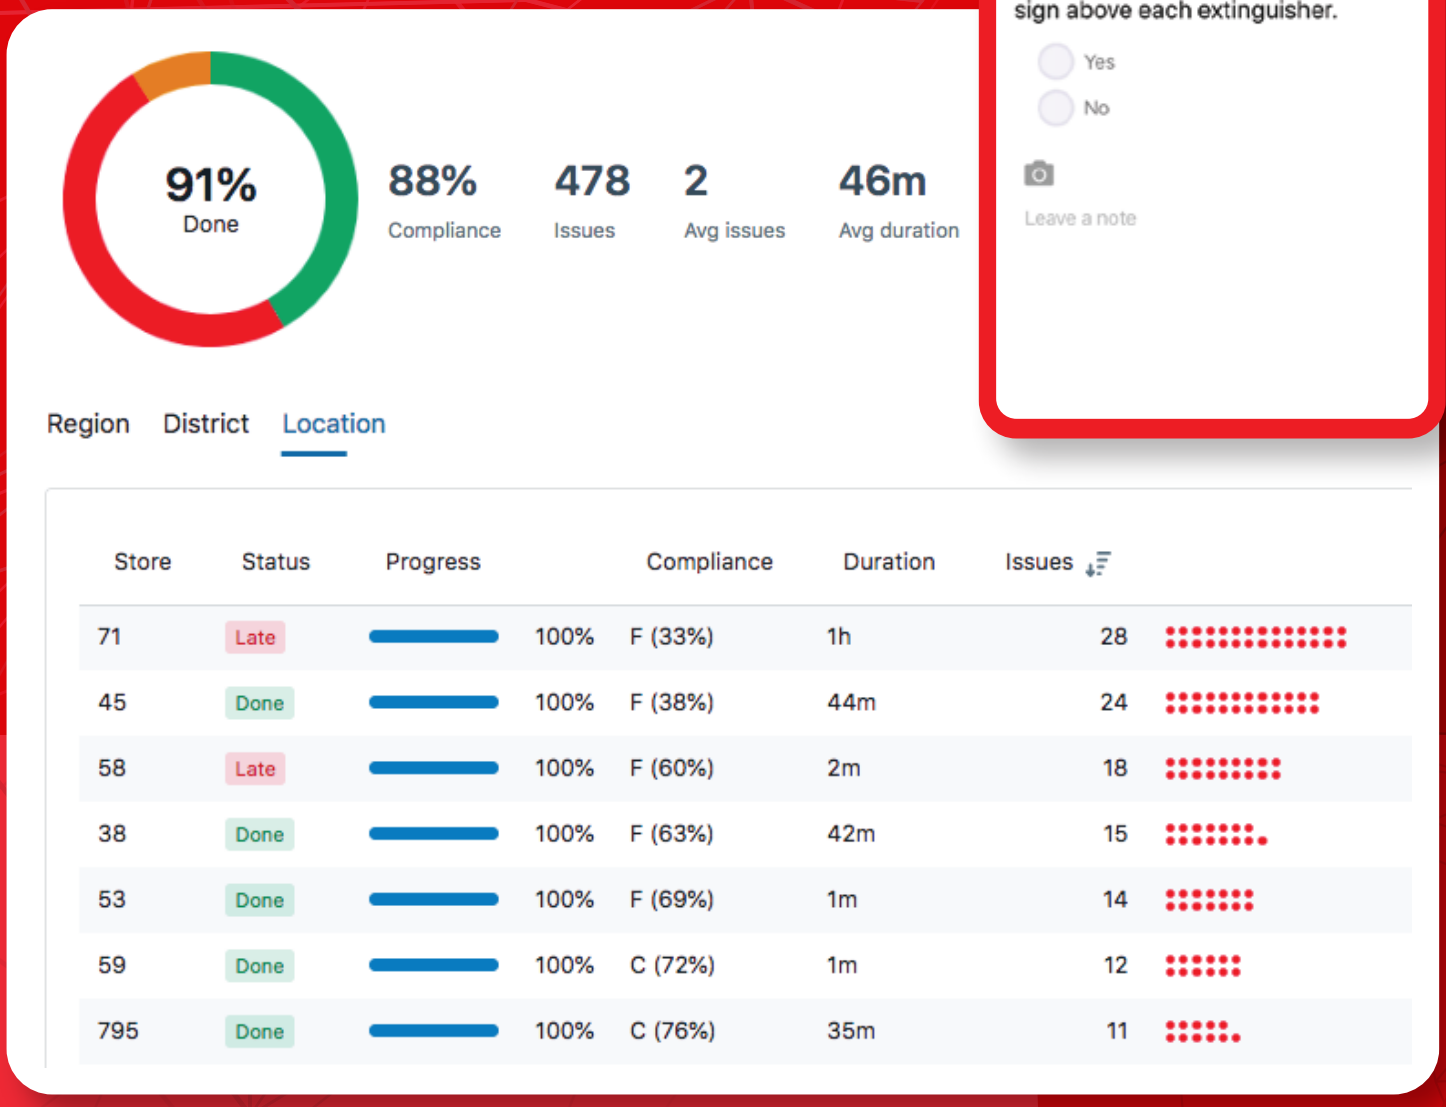
Late	Super Bowl Items Added to Clearance	02/04/2019	02/05/2019	+8h

Checklists

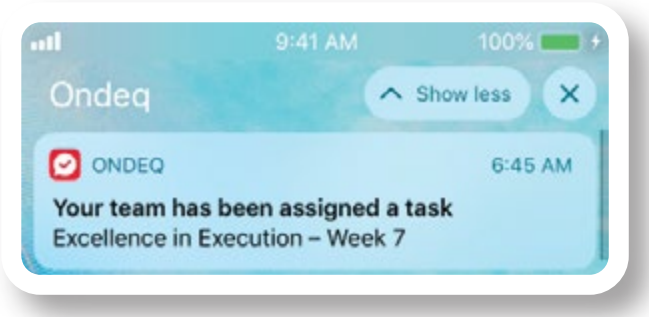
Setup checklists that your team can complete on daily, weekly, or other frequencies. Reports let you easily summarize key metrics and drill down to locations with issues.

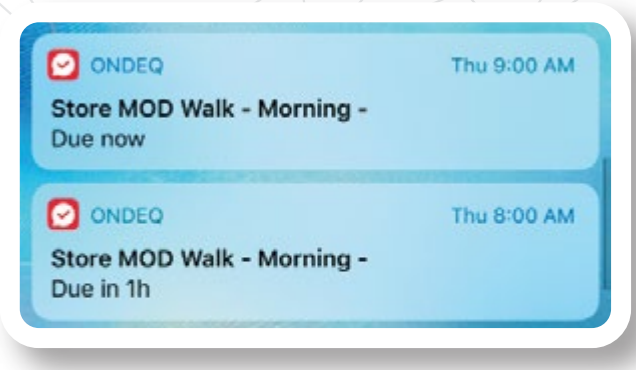


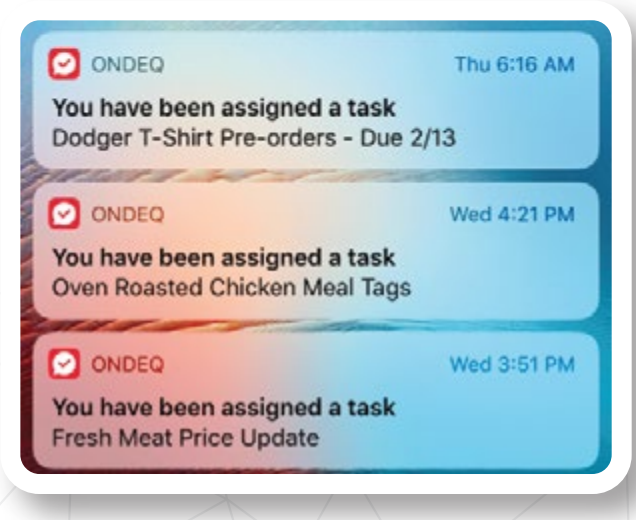


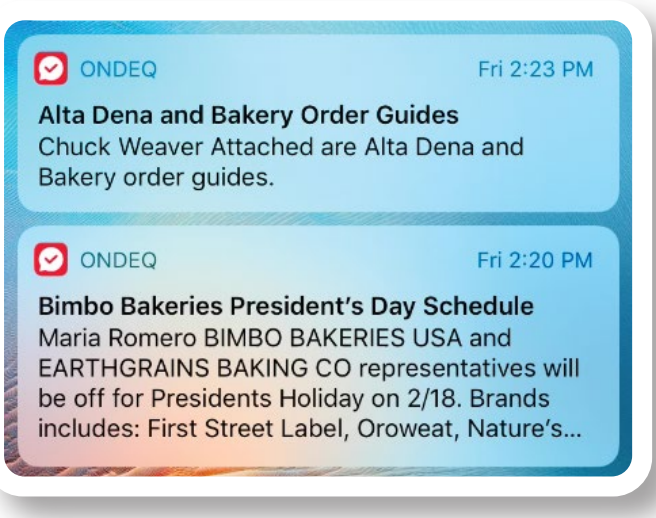
Notifications & Reminders

Automated notifications alert the team when there is new information available. Built in reminders help people stay on track throughout the day.



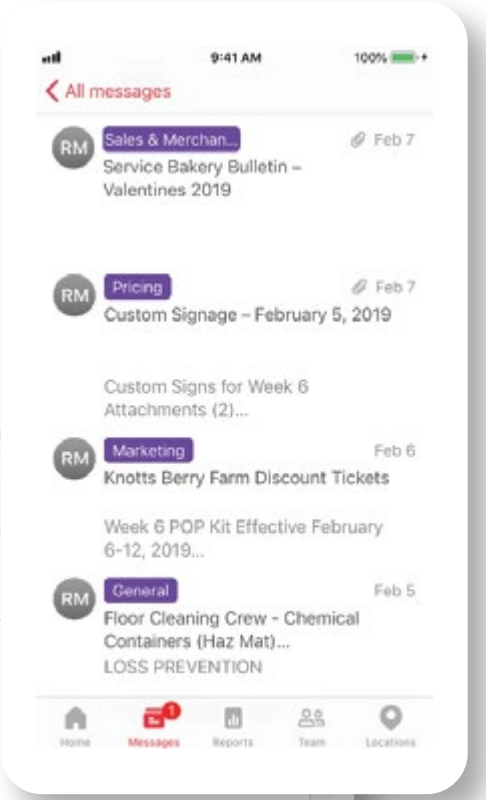


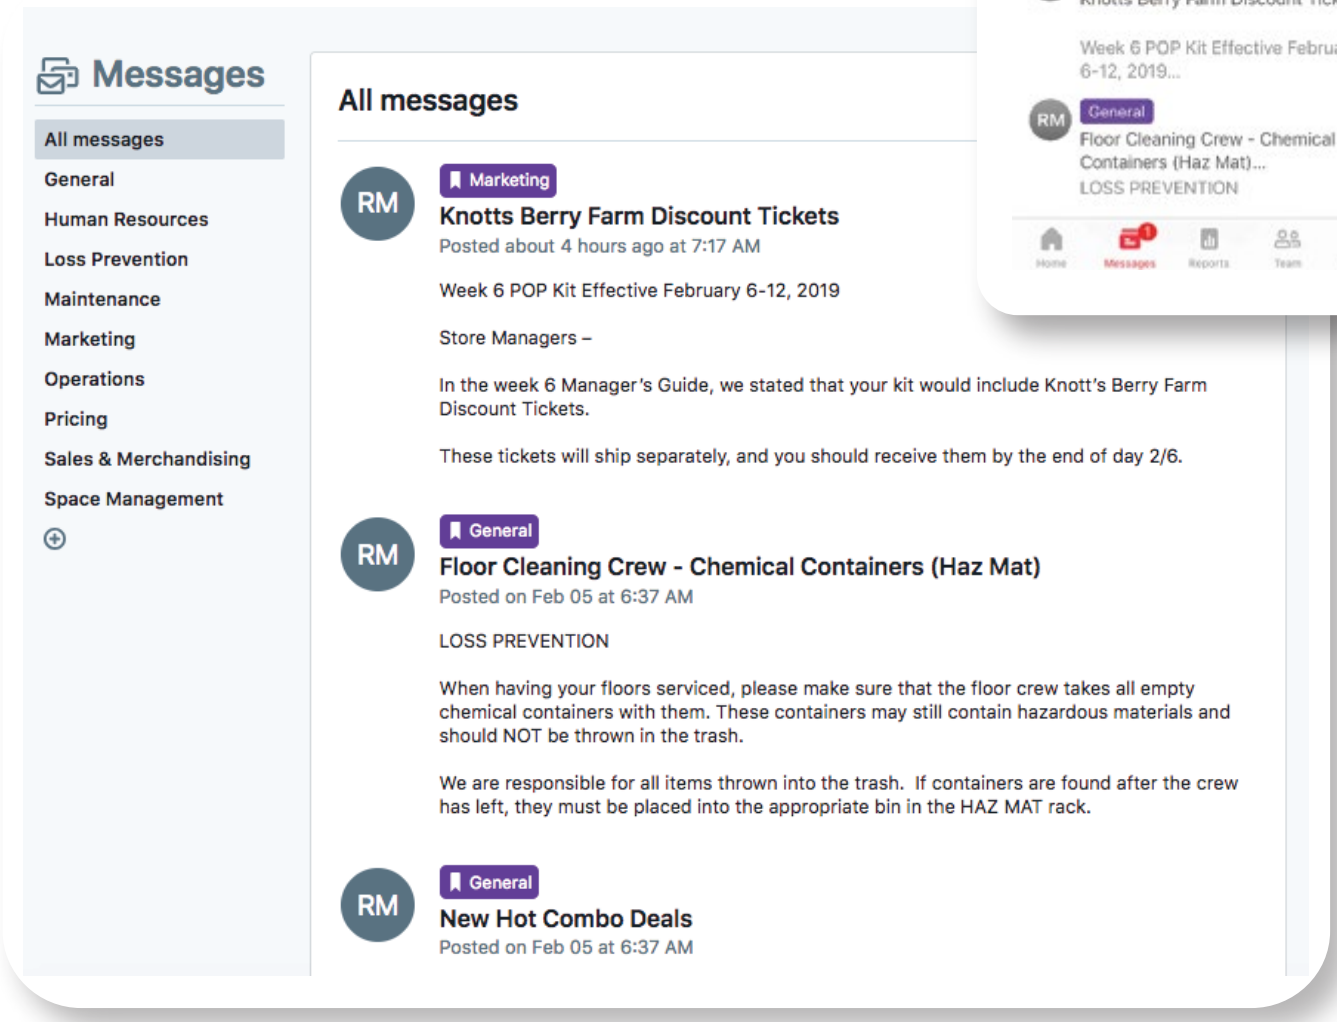




Messages

Send helpful information to your team. Topics are easy to create so you can label information into different categories like Sales, Pricing, Safety, and other areas relevant to your operation.





And Lots More

Cloud

All you need are web browsers and mobile devices

Device Friendly

Runs on iPad, iPhone. & Android mobile devices, laptops, and desktops

Customizable

Fits to your business and the way you want to get and share information

Get The Picture

Verify issues and brand displays with photos captured in real time

Reports

Instant reports that are easy to filter by location, time, and other criteria

Alerts

Automate reminders and checks based on due date and time

Secure

Latest industry standard encryption and individually controlled access.

Print

Paper still works

Control

Easy to make changes and add "hot button" topics right away

Sign Off

Know who is accountable

Location Aware

Know exactly where and when information is coming from

Support

Ongoing updates and help when your team needs it

Ondeq
Recap

Consistency

Communicate and report more effectively. Less time manually compiling information & hunting down status.

Execution

Increased accountability drives improved response times, store quality, and financial metrics like sales, shrink, & expense control.

Efficiency

With the right tools, managers work more effectively. Less time spent on back office and reporting.

Free consult

Ready to upgrade your team's internal tools? If your operation can benefit from modernizing Store Walks or other internal processes, contact us to learn more about the new Ondeq platform.

Modern

Modern tools to make the job easier at every layer Corporate, Field and Stores.

Customizable

The solution adapts to your group's unique processes, rules and requirements.

Value

Improved information flow creates operational benefits that far exceed the cost.
